EXPERIENCE

AntStack - Front-end Intern

July 2020 – April 2023

AntStack Website - [ReactJS]

- Contributed to the frontend development of the company's website by building dynamic pages with React, focusing on user-friendly design.
- As an initial developer, helped build critical parts of the website during its commencement.
- Managed regular updates and performance optimizations alongside development.

Hover Design System - [VanillaJS] [TypeScript]

- Among the initial contributors to this project, creating foundational components at its inception.
- Initiated the documentation framework for the project, laying the groundwork for subsequent development, which remains in active use by team members.

PROJECTS

Moodle | NextJs, TailwindCSS, Firebase

Github | Live-Demo

- Daily mood tracking: Users can log their mood each day, helping them identify patterns and triggers over time.
- Secure login and sign-up: The app offers a straightforward sign-up process and secure login, ensuring user data is protected.
- Visual mood representation: The app provides visualizations of mood data, allowing users to see their average mood over weeks, months, and years.
- Reflection and insights: Users can reflect on their mood history, gaining insights into their emotional well-being and fostering personal growth.
- Beautiful and responsive design: The app features a stunning user interface that is highly responsive across all devices, providing an enjoyable experience for users.

Goals | React Native

Github |

- This React Native goals app enables users to easily add and remove goals with a simple, intuitive interface. Designed for user-friendliness,
- it provides an enjoyable experience for tracking personal aspirations and achievements. Stay organized and motivated as you work towards your goals!

EDUCATION

Alard College of Engineering

B.E Computer Engineering - 8.04 CGPA

Pune

2020 - 2024
